Overview

Hi! I'm a software engineer with over 17 years of professional experience developing for the web. Specializing in frontend technologies, I'm passionate about creating user experiences that are accessible, intuitive, and memorable. My obsessive eye for detail ensures pixel precision for every task. I collaborate with designers and stakeholders to deliver responsive and empathetic features, asking the right usability questions and constantly pushing technical boundaries.

2003-2006
BA in Communication
Computer Info. Systems minor

College of Central Florida
2001-2003
Associate of Arts

Work History

Smartsheet - Software Engineer II
2021-2024
Played key role in UI implementation of the React rewrite of flagship card view feature, including animated effects and accessible interactions. Collaborated with design system team to expand and refine internal component libraries. Led multiple award-winning hackathon teams that innovated approaches for bringing themability to UX properties, which were later broadly adopted. Contributed features and fixes to various company projects owned by other teams.

Outreach - Software Engineer
2019-2021
Ported legacy dialogs, forms, and settings pages to TypeScript, refactoring to use React functional components, hooks, GraphQL, and instrumentation. Built and contributed a flexible toast-style notification system to the org's component library. Served as first responder in regular on-call rotation.

CoolBlueWeb - Lead Developer (Magento Team)
2015-2018
Guided a team of 6 Magento Commerce (now Adobe Commerce) developers building and supporting 25 active clients. Architected and implemented standard cloud development workflows utilizing Docker, Git, Composer, Deployer, and DigitalOcean VPS instances. Oversaw replatforming of many sites to Magento 2.
