Overview

Mid-level software engineer with a broad range of skills and specialized knowledge of modern web technologies, emphasizing frontend development. Both an ardent problem solver and a builder of beautiful things for browsers.

Areas of Expertise

- Versed in PHP, JavaScript, HTML5, CSS3, and a laundry list of frameworks, libraries, build tools, and preprocessors
- Over 7 years of ecommerce dev experience, 10 years in the industry, and 21 years hands-on with HTML
- Savvy at the command line; equally at home in a Mac, Linux, or Windows dev environment
- Comfortable with the LAMP full stack, Vagrant, Ansible, cloud hosting, package managers, version control, migration scripts, and some Docker
- Seeks and destroys bugs before breakfast

Academics

Florida Gulf Coast University   Graduated 2006
- BA: Communication, Computer Info Systems minor

College of Central Florida   Graduated 2003
- Associate of Arts, with honors

Most Importantly…

- Excellent communication skills
- Meticulous attention to detail
- Once an autodidact, forever an autodidact
- Fluidly adapts to the changing needs of clients and the pace of technology
- Genuinely takes pride in his work, with respect and admiration for the art of great software design

Prior Craftsmanship

CoolBlueWeb   Magento Team Lead, 2015–Present
- Guided a team of 6 Magento developers building and supporting 25 active clients
- Drafted and implemented an internal Git workflow and standards policy for use in over 60 projects
- Architected new company work order form and process to improve efficiency of agency work
